SUMMARY

Junior Java Backend Developer with strong hands-on experience in designing and developing RESTful APIs using Spring Boot, Hibernate/JPA, and MySQL. Skilled in API development, JWT authentication, role-based access control, and MVC architecture. Experienced in building clean, modular backend systems through real-world projects and internship experience. Seeking an entry-level Java backend developer role in a professional environment.

TECHNICAL SKILLS

Java, Spring Boot, Spring Security, Hibernate/JPA, REST APIs, API Development, JWT Authentication, MVC Architecture, MySQL, SQL, .

EXPERIENCE

Backend Developer Intern — Technify Ltd (Jun 2024 – Aug 2024)

- Developed and maintained 15+ REST APIs using Spring Boot and MySQL.
- Implemented JWT-based authentication and role-based authorization.
- Contributed to backend development of an Online Appointment SaaS platform.
- Optimized database queries, improving API response time by approximately 25%.
- Collaborated with senior developers and followed clean code practices.

PROJECTS

E-Commerce Backend (Spring Boot, JPA, MySQL, JWT)

- Secure backend APIs for users, products, and orders.
- Implemented JWT authentication and authorization.
- Improved database performance by ~30%.

Library Management System (Spring Boot, Hibernate, MySQL)

- APIs for book issue/return with transaction management.
- Role-based access control and fine calculation logic.

Smart Restaurant System (Spring Boot, REST APIs, MySQL)

- Backend for waiter-less ordering system.
- Inventory, menu, and order management modules.

University Admission System (Spring Boot, Hibernate, JWT)

- Multi-role system (Admin, Teacher, Student).
- Admin CRUD modules, Teacher content upload, Student MCQ tests.

EDUCATION

BS Computer Science — University of Sindh, Jamshoro (2022 – 2026)

CERTIFICATIONS

Spring Framework 5 (Udemy) | Java Programming Masterclass (Udemy)
